Price list Great Britain

Introduction

The Charge myHyundai Service rates are governed by the maximum charging speed, for which a fast charging speed usually also implies higher costs. Reduced charging rates from Preferred Partners, such as IONITY, may be regarded as exceptions.

The Charge myHyundai Service differentiates the following charging speeds:

AC – alternating current (normal charging)
DC – direct current (fast charging)
HPC – high power charging (ultra-fast charging)

The maximum charging power capacity of each charging station can be found on the Charge myHyundai website and the Charge myHyundai app.

Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.
